BIOSTATISTICS CONSULTING

INTRODUCTORY PACKAGES

R&D Study Audit for start-ups & SMSEs

Who it suits

This package is ideal for biotech, medical device or pharma start-ups & SMSEs currently engaging in R&D such as product testing prior to any clinical trials phase.

What's included

- *We develop an understanding of your current and long term research and product goals.*
- *We perform a full audit of your existing study design including sample size, power, randomisation, data collection methods and statistical approach.*
- *We recommend any improvements that need to be made to enhance the efficiency or cost-effectiveness of your research. If needed a Statistical Analysis Plan (SAP) can be developed to replace existing methodology.*
- *We produce a concise report of our findings and recommended adjustments.*

£1500

BIOSTATISTICS CONSULTING

INTRODUCTORY PACKAGES

Clinical Study Audit for start-ups & SMSEs

Who it suits

This package is ideal for biotech, medical device or pharma start-ups & SMSEs currently embarking upon pre-clinical or clinical trials.

What's included

- *We develop an understanding of your current and long term research and product goals.*
- *We perform a full audit of your existing clinical trial design and study protocol, including sample size, power, randomisation, data collection methods and statistical approach.*
- *We recommend any improvements that need to be made to enhance the efficiency or cost-effectiveness of your research. If needed a Statistical Analysis Plan (SAP) can be developed to replace existing methodology.*
- *We produce a concise report of our findings and recommended adjustments.*

£2000

BIOSTATISTICS CONSULTING

INTRODUCTORY PACKAGES

R&D Statistical Analysis Plan (SAP)

Who it suits

This package is ideal for biotech, medical device or pharma start-ups & SMSEs intending to engage in R&D such as product testing prior to any clinical trials phase.

What's included

- *We develop an understanding of your current and long term research and product goals.*
- *We develop a Statistical Analysis Plan (SAP) for your upcoming research project.*
- *The SAP will include a study design and statistical methodology that optimises data collection to maximise insights, keeping your long term goals in mind.*
- *Associated sample size and power calculations.*

£3500

BIOSTATISTICS CONSULTING

INTRODUCTORY PACKAGES

Clinical Trial Statistical Analysis Plan (SAP)

Who it suits

This package is ideal for biotech, medical device or pharma start-ups & SMSEs intending to embark upon pre-clinical or clinical trials.

What's included

- *We develop an understanding of your current and long term research and product goals.*
- *The SAP will include a clinical study design and statistical methodology that optimises data collection to maximise insights, while being adaptable to changing trial conditions.*
- *Associated randomisation schedule as well as sample size and power calculations.*

Contact us about meta-analysis or Bayesian meta-analysis packages for clinical trials and other study planning. Prices differ.

£5500

BIOSTATISTICS CONSULTING

FOLLOW-UP PACKAGES

R&D Statistical Analysis Report (SAR)

Who it suits

R&D projects or pilot studies with a statistical analysis plan already in place that have acquired data for analysis.

What's included

Data preparation and planning.

Full statistical analysis according to predetermined specifications.

Graphs & tables.

Publication quality report.

Powerpoint summary presentation of key insights for your use.

Full explanation & follow-up.

£2500

BIOSTATISTICS CONSULTING

FOLLOW-UP PACKAGES

Clinical Trial Statistical Analysis Report (SAR)

Who it suits

Phase 0-IV clinical trials with a statistical analysis plan already in place that have acquired data for analysis.

What's included

Data preparation.

Full statistical analysis according to predetermined specifications.

Modifications & interim analyses.

Graphs & tables.

Publication quality report.

Powerpoint summary presentation of key insights for your use.

Full explanation & follow-up.

from £3000

BIOSTATISTICS CONSULTING

SUBSCRIPTION PACKAGES

Biostatistical Service Subscription (Retainer)

Features & Inclusions

- *Full project management of the statistical component of your research from study design and data analysis to reporting.*
- *Allocation of a senior biostatistician and/or bioinformatician experienced in your niche for up to 40 hours consulting per month.*
- *20% off the average hourly consulting rate.*
- *6 month duration with possibility of renewal.*
- *Can span multiple projects.*
