# BIOTECHNOLOGY CONSULTANCY FIRM OF THE YEAR

Anatomise Biostats

www.anatomisebiostats.com | +44 (0) 333 303 4392 | statistician@anatomisebiostats.com

Founded in Australia, and headquartered in London, UK, Anatomise Biostats is a consultancy specialising in biostatistics and bioinformatics. Operating within the medical technology (Med-tech) industry, the boutique firm serves companies from across the globe with a core focus on start-ups and small-to-medium-sized enterprises. Introducing new products to the market requires successful trials and regulatory approval, and this is where Anatomise Biostats becomes a trusted partner to emerging businesses in the med-tech space. The consultancy's team of biostatisticians and bioinformaticians are highly experienced, boasting knowledge across an array of therapeutic niches which enable them to support their client's research and development journey. Anatomise Biostats' core service is in the bespoke design of clinical trials and the analysis of complex data derived from those studies.

Offering consultancy on an individual project or retainer basis, as per its client's long-term needs, Anatomise Biostats' core focus is to ensure that its clients can prove the safety and effectiveness of their products. The firm supports these companies by assisting them throughout the data journey, from designing an effective clinical study and analysing the results, to creating an effective report that supplements improved decision making. The team's collective experience across clinical areas including biopharma, therapeutic devices, and diagnostics devices ensures they are well-positioned to become a key partner for a diverse range of companies in the med-tech space. Personalised medicine is amongst the major industry trends, and Anatomise Biostats' bioinformatics analysis is helping its companies develop the methods used to evaluate tailored treatments.

The judging panel was impressed by the bespoke nature of the consultancy's solutions, which are entirely flexible according to the complexity of its client's projects and their specific needs as a team. Regardless of the service option chosen, Anatomise Biostats' bespoke data solutions are delivered with accuracy and efficiency in mind, often saving its client's time and money by lending their expertise. The biostatisticians and bioinformaticians that form the consultancy's core service delivery continue to remain up to date with the latest regulatory changes in multiple parts of the globe, ensuring their clients remain compliant.

  
**Anatomise Biostats' clinical design, analysis, and reporting are helping innovative new products enter the Med-tech space.**
